

```
func mySuperCoolMethod() {  
    if someCondition {  
        doSomething()  
    } else {  
        messagePresenter.present(message: String?,  
                                  title: String?,  
                                  on viewController: UIViewController,  
                                  completion: (() -> Void)?)  
    }  
}
```

```
protocol MessagePresenter {  
  
    func present(message: String?,  
                 title: String?,  
                 on viewController: UIViewController,  
                 completion: (() -> Void)?)  
  
}
```
